

Thomas Brun – Full-Stack Developer

📍 Halifax, NS • 📞 902-219-4504 • thomas.brun.1703@hotmail.com
linkedin.com/in/thomasbrun1 • github.com/littl3fo0t • **Portfolio:** thomas-brun.vercel.app

Graduate student in Full-Stack Application Development with **4 years of professional experience** building and maintaining high-quality applications in the insurance industry. Hands-on experience working in Agile environments across the full software development lifecycle, including frontend and backend development, database design and integration, and testing. Strong communicator with attention to detail, able to collaborate effectively with both technical and non-technical stakeholders to ship reliable features. Fully bilingual in **English** and **French**.

Relevant Work Experience

Developer / Senior Developer – Duck Creek Policy/Product

AXIS Capital, Halifax, NS, Canada — *Aug 2020 – Jul 2024*

- Contributed to the maintenance and enhancement of an in-house product development framework used by underwriting teams to accelerate new insurance product creation. Helped refine the framework while simultaneously developing a new product, reducing the delivery timeline from the usual 3–6 months to **1.5 months**.
- **Led** a minor production release in 2022, coordinating development tasks and stakeholder communication.
- Analyzed extensive vendor documentation to identify unsupported legacy customizations and refactor them into cloud supported configurations during the company's migration from on premises to the cloud while keeping current system behavior and business logic intact.
- Collaborated with business analysts and QA across the lifecycle to clarify requirements and tighten feedback loops.
- Maintained coding standards, documentation, and unit testing practices in an Agile environment to improve maintainability and release predictability.

IT Trainee

The Mauritius Commercial Bank, Quatres Bornes, Mauritius — *May – Jul 2019*

- Queried databases using SQL and formatted results in Excel to fulfill urgent staff requests within agreed deadlines.
- Created a centralized repository of recurring requests to streamline onboarding for future trainees.

Projects

Client Portfolio Website (Group Project) • [Live Demo](#) • [Repository](#)

- Developed a full-stack- website for a real-world- client (a carpenter), including a public portfolio and a secure admin dashboard for adding, editing, and removing site content.
- Built a responsive, accessible front-end using **Next.js**, **TypeScript**, **Tailwind**, and **dnd-kit**, enabling intuitive drag--and--drop content organization.

- Implemented backend features through **Next.js API routes**, **Prisma**, and **PostgreSQL (using Neon)** to support structured and scalable content management.
- Integrated **OAuth** authentication for a single administrative user and using **Cloudinary** for optimized media storage and delivery.
- Established comprehensive testing with **Vitest**, **Cypress**, and **React Testing Library** to ensure reliability of both UI interactions and server logic.
- Followed Agile practices by dividing work into **three sprints** using GitHub Projects for planning and issue tracking, and leveraging **GitHub Actions** to automate builds, tests, and workflow tasks.
- Utilized **AI-assisted development tools** to accelerate coding, documentation, and research, enabling our group to deliver the project within a **3--week timeline**.

RESTful API • [Live Demo](#)

- Designed and implemented a RESTful API following standard REST principles using **Bun**, **Hono**, and **TypeScript**.
- Modeled application data and enforced schema validation using **Mongoose** to ensure data consistency and integrity.
- Wrote clear request/response contracts and error handling to improve reliability and developer experience.

Poker Hand Analyzer • [Live Demo](#) • [Repository](#)

- Built an interactive Vue.js application that retrieves and manages card data from an external REST API.
- Implemented game logic to evaluate poker hands, handle card replacement, and enforce game rules across multiple rounds.
- Designed reactive UI state updates to reflect hand changes, shuffling, and score evaluation in real time.

Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript/TypeScript, SASS/SCSS, Bootstrap, TailwindCSS, Vue.js, React
- **Backend:** Node.js, Express.js, Hono, Bun
- **Databases:** SQL Server, PostgreSQL, MongoDB
- **Testing:** Jest, Vitest, Cypress, RTL
- **Tools & DevOps:** Git, GitHub Actions, Figma, Jira, Cloudinary
- **AI-Assisted Development:** Cursor, Gemini, ChatGPT

Education

Bachelor of Science in Computer Science and Business Administration

Saint Mary's University, Halifax, NS, Canada — *Sept 2016 – Apr 2020*

Graduate Certificate – Full Stack Application Development

NSCC – Institute of Technology Campus, Halifax, NS, Canada — *Sept 2025 – May 2026*
